

# ADD

## Efficiency and Improved Accuracy

Implementing ADD Systems® Process Automation tools can eliminate manual tasks—increasing efficiency, improving accuracy and creating better customer satisfaction.

Products like ADD eServer® can automatically send billing documents to customers, import and match supplier invoices, and much more, all on a schedule of your choosing.

## MANAGE INVOICES

Save time by importing supplier invoices and electronically matching what you purchased against the vendor's invoice. Those that match are automatically paid, and invoices with discrepancies are flagged for review.

## PRODUCT COST AND PRICE UPDATES

Automatically update your costs and prices by supplier and by product via supplier websites and services, such as DTN, or update your pricebook directly from your supplier cost updates. Get paid faster and reduce postage costs by automatically sending billing documents to customers via email, fax or services like DTN.

## EPRICE QUOTES

Send scheduled price quotes to your customers automatically. Base those quotes on your costs (also automatically received) or customer contracts.

## WHOLESALE DISPATCH

Dispatch your orders based on the best supplier locations for price and the best haulers for freight.

## AUTOMATED RESOURCE FOLLOW-UP

Send scheduled email notifications to employees automatically, reminding them that follow-up action is required for certain customers.

## SCAN DATA INCENTIVES

Let our software compile all your scan data and automatically submit it to manufacturers and marketing companies. Don't miss out on any financial incentive programs!

**ADD** ▶ More to E3  
and eStore  
with Process  
Automation

Seamless management of accounts receivable, credit, delivery, service, inventory and more.

Comprehensive tracking, analysis and management of sales, purchases and inventory for multi-store operators.
