

A COMPLETE MOBILE SOLUTION FOR FLEET FUELING

ADD Systems® created the Raven Fleet Fueler APP to give you a complete end-to-end delivery solution for your fleet fueling, wet hosing and wheel-to-wheel delivery needs. The Raven Fleet Fueler on an Android phone (as a cost effective scanning device) works in concert with Raven and allows you to deliver fuel to each piece of equipment on a fleet fueling site as expeditiously as possible, all while automatically recording all the delivery detail you and your customer need. Leave Raven in the cab and just take your Raven Fleet Fueler as you fill all the equipment without returning to the truck. Your driver efficiency will improve exponentially and your customer will be more than pleased with the invoice accuracy. ADD Systems is the leader in providing mobile computing solutions to the petroleum and propane marketplace. Discover why

(available separately)

CUT THE DRIVERS TIME IN HALF

How much time does your driver spend at a fleet fueling customer site walking back and forth to the truck and climbing in and out of the cab? Or maybe you use two employees, one to call out the equipment and pump the fuel, and another who stays by the truck meter, writing down the delivered volume for each individual piece of equipment. Now you can get all that time back – no back and forth needed and no extra employee.

DELIVER TO THE RIGHT EQUIPMENT

It can be challenging to verify that you are delivering to the right piece of equipment, especially in a dark warehouse or big lot, but not with the Raven Fleet Fueler. It supports QR code scanning, which means you can easily label equipment one time and then simply scan each piece of equipment before pumping the fuel to verify that it is correct. It's one click of a button.

CAPTURE THE DETAIL

You probably currently go through a number of manual or complicated processes to keep the necessary detail on your fleet fueling customer deliveries. Not anymore. Now all the detail will automatically be on the invoice and stored in the customer history. You see the total gallons delivered at that site and the gallons associated with each piece of equipment. Just the kind of detail your customer needs!

IMPROVE CASH FLOW

Get paid quickly by leaving an accurate, fully detailed, delivery document upon delivery. Capture a signature right on the Raven Fleet Fueler and start printing the delivery record from a click of a button on the Raven Fleet Fueler as well. The fully detailed document will be waiting for you and the customer in the cab.

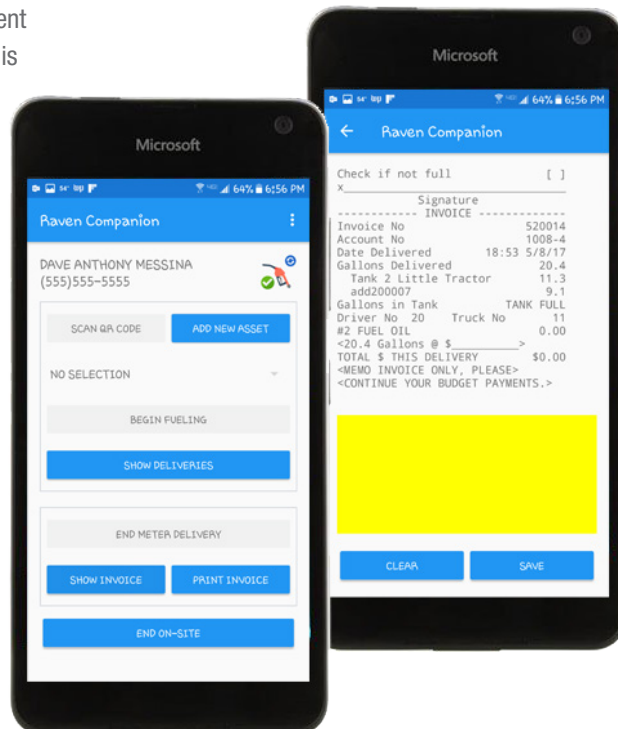

ADD Energy E3®

Seamless management of accounts receivable, credit, delivery, service, inventory and more.

Raven® Mobile

Add the power of ADD Energy E3 to the front seat of your delivery trucks and into your drivers' hands.
